DETAILED ACTION

This action is in response to the papers filed 10/20/03.

Claims 1-6 are under consideration.

Priority

Applicant is requested to update the first line of the specification to indicate the following:

This application is a continuation of US Ser# 10/007,073, filed 12/04/2001 now US PAT 6,635,428.

Drawings

No drawings were filed.

Information Disclosure Statement

A signed and initialed copy of the IDS paper filed 1/8/04 is enclosed.

Claim Objections

Claim 3 is objected to because of the following informalities: detectable is misspelled. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 1648

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Weinberger *et al.* (from IDS and cited in the application).

The claims require SEQ ID# 3 or a labeled SEQ ID# 3.

Weinberger *et al.* teach the same sequence, see Table 1 oligo BS-1.

Thus, Weinberger *et al.* clearly anticipate the claimed invention.

Claim 1 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by SCORE result #5 for SEQ ID #6.

The claim requires “having” and this is considered open language (comprising) and thus can include longer sequences. The specification at pages 10-11 discloses the length of oligo but the definition is not limiting to a specific size.

SCORE result #5 for SEQ ID #6 teaches the sequence used in Methods in Enzymology 1999 (sequence not printed the reference but part of disclosed clones so only the sequence comparison is enclosed).

Thus, SCORE result #5 clearly anticipates the claimed invention.

Allowable Subject Matter

Claim 6 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form.

SEQ ID #s 4 and 5 are free of the prior art.

Conclusion

No claim is allowed.
